Department:  
Education  
PROVINCE OF KWAZULU-NATAL

Boston College hosted a Career Compass in partnership with the eThekweni Municipality Office of the Deputy City Manager: Human Settlements, Engineering Service & Transport Authority Cluster - Support Services Unit and the Department of Education Kwa-Zulu Natal. Support Services unit offered their full support towards making the entire event a success; providing transportation for the learners to and from the programme for the day. The event took place from the 26<sup>th</sup> of July 2018 at the Olive Convention Centre.

Career guidance and motivational talks were done by various professionals who are specialists in their fields of study as well as those who are still on their way up. Professionals ranged from IT, PR, Education, Marketing to Accountants and those officials who hold PHDs. The targeted group of learners was grade 12s from various schools in the eThekweni region.

This was very inspirational towards learners as they were addressed directly by people who were talking from experience. It was insightful for them in order to make sound choices when making decisions about choosing their ideal careers and right tertiary institutions for their various career choices. Learners were provided

with valuable information and motivation. There were bursary opportunities with some of the learners going away with some for their schools and one learner who got a whopping R30 000.00 worth of a bursary on the spot to study at Boston City Campus in 2019. It was a successful, well planned and organised event.
