

# BISASAR RD: OFFICE CONVERSIONS

Address: Bisasar Road Landfill Site  
 Ward: 25  
 Client:  
 Contract Period: Sept 2013 - Present  
 Contract Value: R12 million

DSW – Plant and Engineering have approached City Architecture to convert an old incinerator building at the Bisasar Road Landfill site to offices. This project comes on the back of the anticipated filling of the landfill by the end of 2014, leaving surrounding facilities open for repurposing and redevelopment with alternative functions – as seen with the incinerator building. The site is required to be redeveloped and revamped for the use of DSW Education wing which focuses on educating the public about reducing consumption, re-using old products, recycling material and living a “greener” life.
