

CSA 2430 Sydenham Clinic

Address: 13 Rippon Road, Sydenham Heights
Ward: 31
Client: Ethekewini Health Department
Contract Period: 15-04-2015 - 30-08-2016
Contract Value: R9.795 million

The clinic was constructed on the site of the existing clinic facility which was housed in an ageing structure which no longer complied with current standards for healthcare and infection control. The building platform was also lowered to provide for better ramped access to the clinic.

The new clinic provides 9 consulting rooms and an emergency treatment room, with two separate waiting areas to allow isolation of TB patients, and has a forced ventilation system to facilitate infection control. Reception staff, toilet and sluice facilities are included in two wings bounding the central waiting areas, which are provided with excellent clerestory lighting. A central pharmacy store and senior nurse station divide the waiting areas.

Undercover outdoor queuing spaces provide for protected waiting, as the clinic often experiences high patient numbers.
